

Empowering Librarians for Information Literacy

Sooth is a cutting-edge, ad-free search engine tailored for knowledge seekers, offering a curated index of expert content from reliable and diverse sources across the web. It's an indispensable tool for librarians in K-12, academic/research, and public library environments.

Key Features for Librarians

Curated, High-Quality Sources

Thousands of high quality news, periodicals, academic and scholarly resources, think tanks, government sources, and many others without commercial content, ads, AI Chatbots, or unreliable information.

Information Literacy Tools

NewsGuard Reliability ratings and AllSides Media Bias Ratings to promote critical thinking and source evaluation skills among users. One-of-a-kind Misinformation Toolkit.

Enhanced Research Support

Organized search results by source category for efficient discovery. Built-in citation and Works Cited generator, article summarizer, and leveling for better research and learning.

Collaborative Features

Facilitates the creation and sharing of research collections and bookmarks, enabling collaboration and transparency in the research process.

Privacy and Compliance

Fully COPPA & FERPA compliant for K-12 settings. Member of Student Data Privacy Consortium.

Easy and Secure Implementation

Web-based application with no technical setup required and offers single sign-on options and accessibility across various devices.

K-12 Libraries	Academic Libraries	Public Libraries
Supports curriculum-aligned research	Streamlines scholarly research	Provides reliable information for inquiries
Promotes responsible online research habits	Aligns with ACRL Framework	Supports lifelong learning for the user
Protects student data and privacy, COPPA compliant	Enhances research consultations	Assists with fact-checking and media literacy
